

## 2010-2011 School year Time Period

### Baroque period

The Baroque Period covers the years 1600-1750. In this period, our spiritual emphasis comes in “adding line upon line and precept upon precept” in order to build on the truths that the students have learned in the previous two years.

The arts of this period are distinguished by their embellishments and excessive emotionalism, as is much of the culture found in the courts of Europe. In sharp contrast is the exploration and early colonization of America by the Pilgrims, puritans and others seeking religious freedom and a simple way of life.

Topics for this period include:

Separatists and Strangers  
American Colonization  
Native Americans  
The Court of Louis XIV  
Period Artists and Musicians  
Restoration Theater
